#### **COURSE DESCRIPTION**

**Course** – Hilly 22 mile loop around the Barkhamsted Reservoir with 2100 feet of elevation change per lap. The finishing climb is part of the loop and will be traversed once or more during the race (except Cat. 4/5). The climb itself is about 2.2mi at a consistent 5% grade.

**Course Description:** The racers start in front of the E Hartland volunteer firehouse and then proceed south on 179, in a clockwise direction around the reservoir. At the junction of Routes 179 and 219 (about 4.3mi), the racers will bear right onto 219 south. The race will move in a clockwise direction so that at intersections

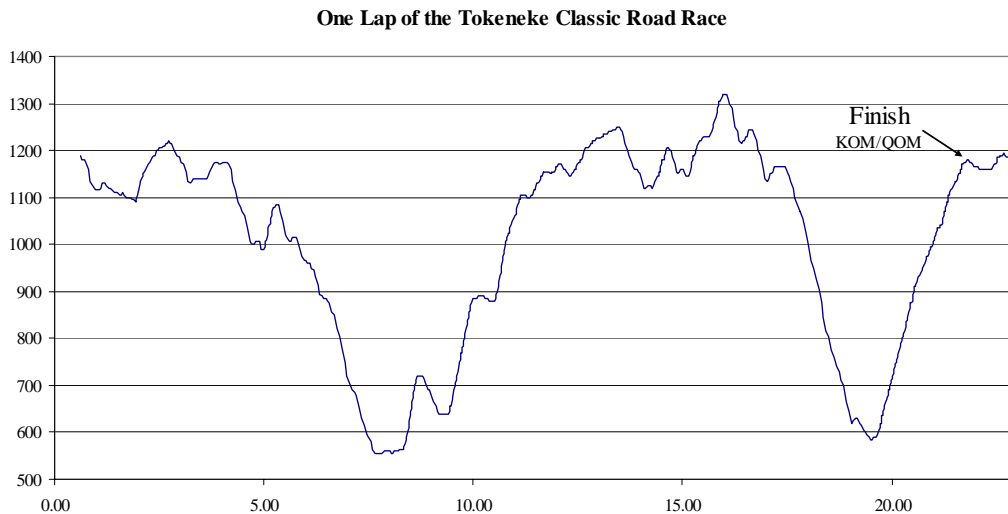

the racers turn right, thus avoiding having to cross other lanes of traffic. At the intersection of 219 and 318 (about 6.9mi), the race will bear right onto 318 west and will go over the Saville Dam. Just past the dam at about 7.7mi, the race will turn right onto Beach Rock Road. This is the first climb. At the corner of Beach Rock and 181 (about 8.6mi), the racers will turn right and travel north on Route 181. In West Hartland (about 15.9mi), the race will proceed east on Route 20, completing the lap by returning the racers to the corner of Routes 20 and 179 in East Hartland. See [www.tokenekeclassic.com](http://www.tokenekeclassic.com) for race course maps.

**Start Line** will be in front of the East Hartland Volunteer Firehouse.

**Finish Line** will be at the top of Rt 20 / N Hollow Rd (about ½ mile north of the start – north from the start on Rt 179 to the intersection with Rt 20, then about ½ mile north on Rt 20).

**Feed Zone** will be a few hundred meters before the finish line on Rt 20 / N Hollow Rd. No feeding outside the feed zone. Neutral water will be supplied for 3-lap afternoon races only.
